

KEYBOARD ARM AND TRAY

Houdini Keyboard Arm
Spectra Keyboard Tray

Houdini™ Keyboard Arm

Item No. 28029

A complete system that works like an extended mechanism but stows like a short arm. For corner, straight or short return installations.

- Track Length: 17.75"
- Height Adjustment: Lift and Release
- Tilt Adjustment: Soft Touch Wheel
- Tilt: +10°/-20°
- Positive Tilt Lockout: Field Installable
- Height Range: 8"
- Base Swivel: 360°
- Material: Steel
- Finish: Black Powder Coat

Our Houdini keyboard arm support is made almost completely of steel, whether considered by weight or volume. Our steel supplier informs us that the steel we purchase is typically made up of 20 to 25% recycled steel, or scrap steel that is melted in with new steel during the smelting process. All of the steel in our products is 100% recyclable. All scrap steel produced during the manufacturing process is recycled. The next biggest component is the packaging materials. The dominate material used is cardboard. It is made from 75% recycled material and is 100% recyclable. As a matter of practice Intellaspaces recycles its cardboard. There are a few small plastic components in the product. On average, the plastic components are made from 25% recycled content. As a general comment it is fair to say the product contains 25% recycled content and is essentially 100% recyclable.

Spectra™ Keyboard Tray
