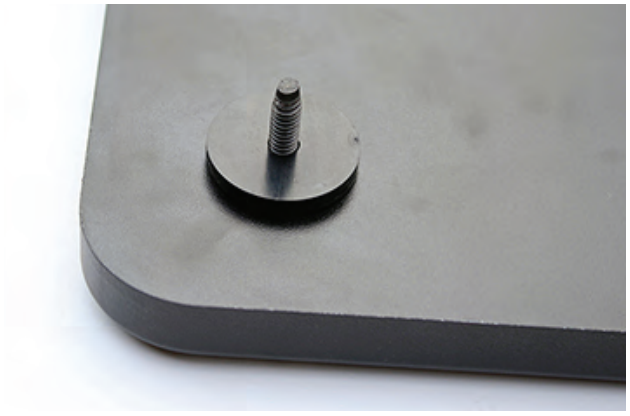
SIMPLE KEYBOARD TRAY WITH MOUSE PLATFORM SET-UP INSTRUCTIONS

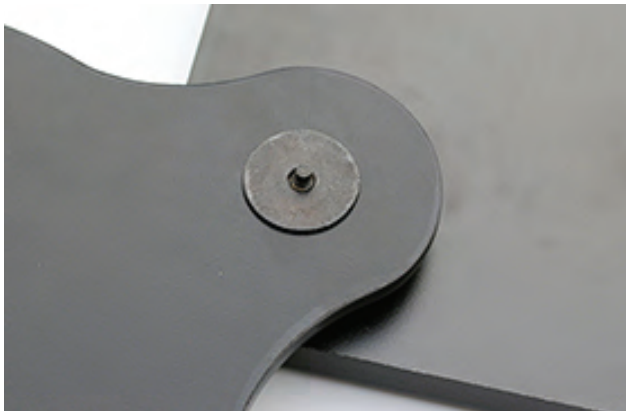
STEP 1

Using the 1.625" screw (D), push through the thin plastic layer covering the screw hole on the mouse platform (B) and on the desired side of the keyboard tray (A).



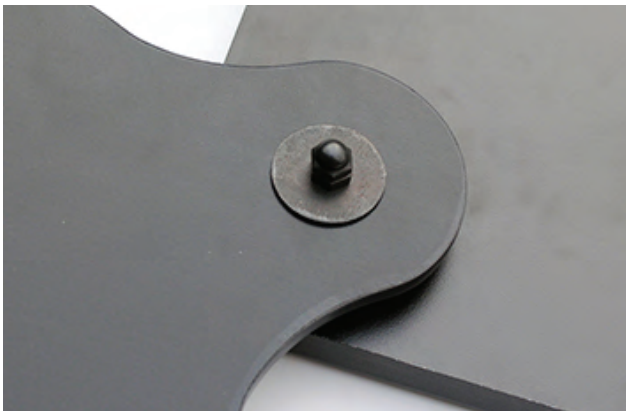
STEP 2

From the top of the keyboard tray (A), insert the screw (D) all the way into the hole. Flip keyboard tray over. Place the three plastic washers (F) onto the screw(D).



STEP 3

Place the screw (D) through the hole in the mouse platform (B). Place the metal washer (G) onto the screw (D).



STEP 4

Thread the nut (H) tightly onto the screw (D). Cap securely with the crown nut. (I)

STEP 6

Flip keyboard tray over. Peel backing off from palm rest (C) and stick in place on the bottom edge of the tray, covering screw hole.
